Phase I Environmental Site Assessment

Prepared in accordance with ASTM E1527-21

1. Summary

No recognized environmental conditions (RECs) were identified at the subject property.

One historical REC (former heating-oil tank, closed in place) requires no further action.

2. Scope of work

Records review: federal, state and tribal databases; historical aerials and Sanborn maps.

Site reconnaissance and interviews with the property manager and the local fire department.

3. Findings

Adjoining sites: no listed releases within the approximate minimum search distance.

Vapor encroachment screening: no vapor encroachment condition identified.

4. Recommendations

No Phase II investigation is recommended at this time.

Illustrative sample for a software demonstration. Not a real report. The vault shows the record's file and property.
